Where these figures come from. Prices: pizza hut official storefront API (304); third-party: menuspot, pricelisto (6); third-party: pricelisto (4).

Allergens: Pizza Hut UK official menu data (32). The allergen column counts the regulated allergens the chain declares for that item. The item's own page names them.

* marks a price taken from a dated third-party listing rather than the chain itself. A shared kitchen means cross-contact is always possible, so ask staff in the restaurant if an allergy is severe.
